ATLANTA, GEORGIA--(Marketwire - Sept. 26, 2007) - Bombardier Aerospace announced today that Aero Toy Store of Fort Lauderdale, Florida, has placed firm orders for two Learjet 60 XR aircraft, and a Global Express XRS jet with the Global Vision flight deck.

"Bombardier's Global Vision flight deck offers pilots the most advanced avionics technology available today and an unprecedented level of awareness and comfort," said Ben Shirazi, Chief Operating Officer of Aero Toy Store. "We are pleased to be able to offer our clients the ultimate flight control environment that Global Vision provides."

Aero Toy Store provides turnkey solutions for sale and purchase, financing, modifying and enhancing new and pre-owned aircraft. With full-service fixed base operations and sales centers in Fort Lauderdale, Fla., and Montreal, as well as a facility at McCarran International Airport in Las Vegas, Nev., Aero Toy Store's extensive inventory focuses on luxurious wide cabin, long range aircraft, including Challenger and Global Express aircraft.

"The new flight deck is all about advanced technology and streamlined aesthetics with particular attention to detail and luxury, making this Global Express XRS the perfect addition to Aero Toy Store's already impressive range of luxury aircraft," said Pierre G. Cote, President, Bombardier Business Aircraft. "We are proud to offer our Global aircraft pilots the same ultimate comfort their passengers have experienced for years."

Global Vision flight deck

Launched just three days ago at the 60th National Business Aviation Association convention in Atlanta, Georgia, Global Vision flight deck delivers leading edge design, merged with advanced technology to deliver a completely new flight deck experience. The latest in technological advancements from Rockwell Collins - the new Pro Line Fusion avionics suite - is paired with superior design aesthetics from world-renowned design consultancy firm Design Q, to create the ultimate flight control environment. The Global Vision flight deck, scheduled for certification in the third quarter of 2010 and entry in service in 2011, will provide Global aircraft pilots with an unprecedented level of situational awareness and comfort.

Learjet 60 XR: In service since July 2007, the Learjet 60 XR aircraft is poised to set new standards in performance, comfort, value and versatility in the worldwide midsize jet market. The aircraft's higher operating altitudes - certified to 51,000 ft (15,545 m) - translate to time savings due to better winds, less traffic and less turbulence. With a high cruise speed of Mach 0.81 (863 km/h), the Learjet 60 XR jet is one of the fastest aircraft in its category. The aircraft can fly Atlanta-Los Angeles non-stop and delivers superior climb capabilities, with proven fuel-efficiency and low direct operating costs per nautical mile(i).

Global Express XRS: The pioneering Global Express XRS business jet features the largest cabin of any purpose-built corporate aircraft - offering more cabin volume and more floor space than its closest competitor. No other business jet in the ultra long-range segment matches the high-speed range capability delivered by this aircraft. Offering the ultimate in cabin comfort, this impressive jet can link Atlanta-Moscow non-stop with eight passengers and three-to-four crew(i).

About Bombardier

A world-leading manufacturer of innovative transportation solutions, from regional aircraft and business jets to rail transportation equipment, systems and services, Bombardier Inc. is a global corporation headquartered in Canada. Its revenues for the fiscal year ended Jan. 31, 2007, were \$14.8 billion US, and its shares are traded on the Toronto Stock Exchange (BBD).
